Enhancing Decision-Making through Data Visualization: Exploring Canada's Quality of Life Framework Group 05

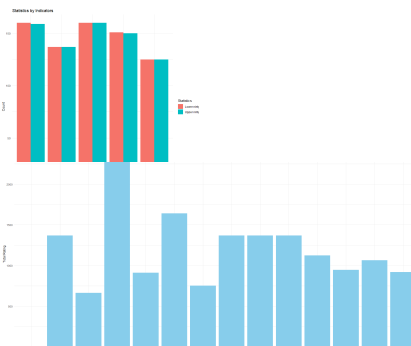

1 PROSPERITY:

- **Socioeconomic Dynamics:** Varied across provinces and age groups.
- **Income and Housing:** Higher household incomes correlate with better housing access.
- **Youth Employment:** Emphasizes addressing youth unemployment and promoting educational opportunities.
- **Tailored Policies:** Variations inform the need for tailored employment policies supporting specific age demographics.

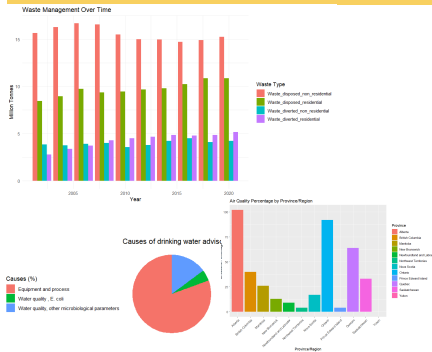

2 HEALTH:

- **Nutrition:** Declining fruit and vegetable consumption across age groups.
- **Healthcare Access:** Slight increase in unmet healthcare needs, particularly among younger age groups.
- **Mental Health:** Noticed an enhancement in perceived mental health, notably among younger and older adults.
- **Life Expectancy:** High health-adjusted life expectancy for both males and females.

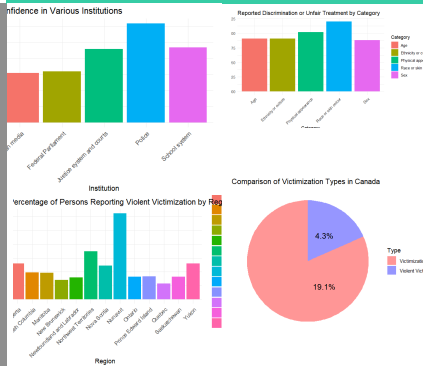

3 SOCIETY:

- **Province SOB:** Noticed The chart highlights strong trust in urban communities but reveals a concerning lack of belonging towards national and provincial levels of governance.
- **Activities time:** The chart illustrates widespread engagement in shopping, religious activities, and dining/drinking, while household care and active sports are less favored pursuits.

4 ENVIRONMENT:

- **Waste Management:**
 - Increasing waste diversion, especially from homes.
 - Slow rise in non-residential waste diversion.
 - Need better data on unknown waste sources.
- **Drinking Water:**
 - Boil water advisories mainly from infrastructure problems.
 - More investment needed for water systems.
 - Some improvement in water quality but challenges remain.
- **Air Quality:**
 - Stable emission shares by province/territory.
 - Indicates consistent industrial profiles over time.

5 GOOD GOVERNANCE:

- **Personal Safety:** Nunavut shows the highest percentage of reported violent victimization, significant higher than other region.
- **Confidence in institution:** Confidence in Police services, school system and Justice system is higher than confidence in other institutions.
- **Discrimination and unfair treatment:** Race and skin color reports the highest percentage of discrimination or unfair treatment, indicating that racial issues remain a significant concern in the survey area.
